

Key Contacts for Local Health Officers

When responding to environmental health concerns or preparing for inspections, health officers are encouraged to consult the [Health Officer Manual](#) for hazard information, appropriate contacts, and steps to take to mitigate different issues. Local health officers are also encouraged to seek guidance from other health officers through the New Hampshire Health Officer List Serve. Email nhlho@maillist2.nh.gov with your questions. You may also contact the [New Hampshire Health Officers Association](#). Below are topic-specific contacts for more information:
